

Writer, 'Journey to the East; Post-COVID China'

02/2024 - Present

Published on Amazon, available through print and digitally on Kindle. A travelogue that walks through Hong Kong, Shenzhen, Xi'an, Shanghai, Beijing and more to tell the story of imperial China, modern life, culture, food, media and more.

Cedar AI (cedarai.com) - Seattle, WA

Modern software for freight railroads, bringing them into the 21st century with automation & artificial intelligence

Flutter & Full-Stack JavaScript Engineer

10/2021 - 1/2024

- Led engineering for the creation of ARMS Mobile, a cross-platform Flutter application that runs in production on iOS, Android & web, onboarding over 20 railroads and over 150 industrial daily active users.
- Built a variety of advanced modules, such as large, performant, indexed list views with multiple interaction patterns, optical character recognition using on-device machine learning models, tree-based directory structures to enable dynamic navigation, customizable navigation bars, permissions-based access to UI components, internal release notes, push notifications through Firebase and APN.
- Managed deployment workflows on all three production environments, including iOS, Android and Web
- Contributed code across multiple cross-functional teams, delivering REST & GRPC API services using Python, working in maximally typed codebases w/ Pydantic & generated Typescript & Dart types. No 'any's.
- Built UI in React with Typescript, managing state with a combo of Redux, Hooks and Context. In addition to critical feature work, added quality of life codebase improvements, ex: Error Boundary to prevent WSOD.
- Built & maintained reusable components for internal component library, used across front-end codebases.
- Added new Webflow.io web pages on our marketing site cedarai.com for mobile, transload, intermodal.
- Continuously served on-call for Sev-1 or Sev-2 incidents for the mobile application.
- Traveled to five different states (CA, AL, KY, GA, WA) to onboard clients, build relationships & code onsite.
- Directly worked with customers to gather feedback, triage bugs & establish a product backlog

Paret0 (paret0.com) - Seattle, WA

Open-source platform for developers to build better work habits, learn full-stack JavaScript, & connect with mentors

Full-Stack Developer

07/2020-08/2021

- Created a Software Developer mentorship program with built-in collaboration functionalities, learning modules, job aides, cheat sheets, keyboard shortcuts, and playing cards to teach JavaScript APIs
- Developed web apps w/ React, incl. live multiplayer leadership competition over WebSockets using API Gateway + AWS Lambda, to provide structure, accountability, & mentorship for code students
- Accepted PRs from 30+ open source contributors on GitHub
- Created and facilitated 6-hour weekend meetups to teach students React, AWS, sprint planning, standups, and retros; utilized open-source React Native application to help engineers train junior developers
- Built curriculum on mobile application, onboarding with GitHub, instructed how to navigate NodeSchool modules, through to building full-stack products for student portfolios
- Shaped participant experience through curriculum design, weekly sprint planning, and standup & retrospective meetings; served as product owner and Scrum Master as well as lead engineer

Unloop - Seattle, WA

Nonprofit building a talent pipeline for software engineering for incarcerated individuals

Full-Stack Developer, Education Lead

10/2019 - 07/2020

- Developed full-stack JavaScript educational materials to be used in a challenging, offline-only prison development environment at Monroe County Correctional Prison in Washington State.
- Trained cohort of 8 paroled and 'work-release' software engineering students in full stack JavaScript;; oversaw remote transition during COVID; secured freelancing gigs for students real-world experience
- As part of non-profit funding model, worked as a consultant for other nonprofits, building a React-based multiplayer business video game simulator, cross platform React Native application & knowledge library

Technical Skills: React/React Native, Redux, TypeScript, Python, Dart, Flutter, AWS, AWS Lambda, S3, Cognito, API Gateway, RDS, DynamoDB, CloudFormation, Amplify, SES, SNS, CloudFront, PostgreSQL, HTML5/CSS3, JavaScript, Pydantic, GRPC, Bazel, Turbo Monorepo, Fluent UI, Material, Firebase, XCloud
Western Washington University, Bellingham, WA - BA, Political Science, Minor in Philosophy 2014
